

Post-Carbon Futures

Author/Director: Yves Billy

Producer: Auteurs Associés

Country: France

Length: 52'

Countries like China and India have entered our car-addicted society model. But this is no longer sustainable and finding solutions that are capable of replacing 100% of fossil energies in the next ten to twenty years is the challenge and the race has started.

Could de-growth and a redistribution of wealth also question the actual dogma of economic growth?

To find a solution to the ecologic crisis, which implies the reduction of our material consumptions, undertakes to change the ratio of social disparity that exists at the heart of our society.
